SUBJECT INDEX

Adjuvants 145
Allergy
  Immunopathogenesis of flea allergy dermatitis in dogs 483
Allografts
  Effector and regulatory T cells involved in the immune response to allografts 255
Antibodies
  Lymphocyte antigens of sheep: identification and characterization using a panel of monoclonal antibodies 91
  Ontogeny of various cell populations defined by monoclonal antibodies in the primary lymphoid organs of the sheep 103
  Phenotypic and functional characterization of pig lymphocyte populations 135
  Regulation of immunity by anti-idiotypic antibodies 161
  Role of antibody in natural resistance to African trypanosomiasis 325
  Synergism between antibody and neutrophils in ruminant mammary gland 389
  Development of nasal, fecal and serum isotype-specific antibodies in calves challenged with bovine coronavirus or rotavirus 425
  Rapid detection of viral-specific antibodies by enzyme-linked immunosorbent assay (ELISA) 453
  Establishment of central nervous system infection by canine distemper virus: breach of the blood-brain barrier and facilitation by antiviral antibody 471
Antigens
  Lymphocyte antigens of sheep: identification and characterization using a panel of monoclonal antibodies 91
  Phenotypic and functional characterization of pig lymphocyte populations 135
  Potentiation of the immune response by immunization with antigens in defined multimeric physical forms 153
  Transfection of genes encoding lymphocyte differentiation antigens: applications in veterinary immunology 291
  Nematode antigens in protection, diagnosis and pathology 313
  Immunochemical studies on the antigens of *Dirofilaria immitis* 345
  Immune response to dietary antigens and its influence on disease susceptibility in farm animals 413
  Immune response to viral antigens as a determinant of arthritis in caprine arthritis-encephalitis virus infection 465
Arthritis
  Immune response to viral antigens as a determinant of arthritis in caprine arthritis-encephalitis virus infection 465
Bacteria
  Synergism between antibody and neutrophils in ruminant mammary gland 389
  Enzyme immunoassay: observations on aspects of quality control 441
Blood-brain barrier
  Establishment of central nervous system infection by canine distemper virus: breach of the blood-brain barrier and facilitation by antiviral antibody 471
Brucella abortus
  Enzyme immunoassay: observations on aspects of quality control 441
Canine distemper virus
  Establishment of central nervous system infection by canine distemper virus: breach of the blood-brain barrier and facilitation by antiviral antibody 471

Cattle
Isotypic, allotypic and idiotypic heterogeneity of bovine IgG2 1
Isolation of genes encoding bovine IgM, IgG, IgA and IgE chains 17
Application of hybridoma technology to study of bovine immunoglobulins 25
Structure of bovine secretory component 37
Transfer of serum IgG1 antibody into the gastrointestinal tract in newborn calves 51
Phenotypic and functional characteristics of bovine T lymphocytes 113
Bovine mononuclear phagocytic cells: identification by monoclonal antibodies and analysis of functional properties 125
Bovine interleukin 2: cloning, high level expression and purification 193
Bovine interleukin 2: regulatory mechanisms 183
Role of antibody in natural resistance to African trypanosomiasis 325
Immune response to respiratory mycoplasmas 401
Development of nasal, fecal and serum isotype specific antibodies in calves challenged with bovine coronavirus or rotavirus 425
Chicken
Chicken immunoglobulins 57
MHC: genomic structure, gene products and resistance to oncogenic DNA and RNA viruses 243
Cloning
Bovine interleukin 2: cloning, high level expression and purification 193
Coccidiosis
Immunity to *Eimeria* infections 333
Complement
Synergism between antibody and neutrophils in ruminant mammary gland 389
Coronavirus
Development of nasal, fecal and serum isotype-specific antibodies in calves challenged with bovine coronavirus or rotavirus 425
Dermatitis
Aspects of the immunopathogenesis of flea allergy dermatitis in dogs 483
Diagnosis
Nematode antigens in protection, diagnosis and pathology 313
Enzyme immunoassay: observations on aspects of quality control 441
Rapid detection of viral-specific antibodies by enzyme-linked immunosorbent assay (ELISA) 453
Dirofilaria immitis
Immunochemical studies on the antigens of 345
Dog
Establishment of central nervous system infection by canine distemper virus: breach of the blood-brain barrier and facilitation by antiviral antibody 471
Aspects of the immunopathogenesis of flea allergy dermatitis 483
Eimeria spp.
Immunity to *Eimeria* infections 333
Encephalitis
Immune response to viral antigens as a determinant of arthritis in caprine arthritis-encephalitis virus infection 465
Endocrinology
Progress on gene transfer in farm animals 303
Escherichia coli
Expression of rabbit IgA heavy chain genes in *E. coli* and in murine myeloma cells 279

Feeding and nutrition
Immune response to dietary antigens and its influence on disease susceptibility in farm animals 413
Flea
Aspects of the immunopathogenesis of flea allergy dermatitis in dogs 483
Genetics
Isolation of genes encoding bovine IgM, IgG, IgA and IgE chains 17
Structure and expression of class I MHC genes in the miniature swine 211
Human HLA-D region — a summary 223
MHC of the chicken, genomic structure, gene products and resistance to oncogenic DNA and RNA viruses 243
Transfection of genes encoding lymphocyte differentiation antigens: applications in veterinary immunology 291
Progress on gene transfer in farm animals 303
Goat
Immune response to viral antigens as a determinant of arthritis in caprine arthritis-encephalitis virus infection 465
Horse
Characterization of a homogeneous paraprotein from a horse with spontaneous multiple myeloma syndrome 69
Immunologic reconstitution of foals with combined immunodeficiency 495
Hybridomas
Application of hybridoma technology to study of bovine immunoglobulins 25
Hypersensitivity
Immune response to dietary antigens and its influence on disease susceptibility in farm animals 413
Aspects of the immunopathogenesis of flea allergy dermatitis in dogs 483
Immunodeficiency
Immunologic reconstitution of foals with combined immunodeficiency 495
Immunoglobulins
Isotypic, allotypic and idiotypic heterogeneity of bovine IgG2 1
Isolation of genes encoding bovine IgM, IgG, IgA and IgE chains 17
Application of hybridoma technology to study of bovine immunoglobulins 25
Transfer of serum IgG1 antibody into the gastrointestinal tract in newborn calves 51
Chicken immunoglobulins 57
Characterization of a homogeneous paraprotein from a horse with spontaneous multiple myeloma syndrome 69
Subclass heterogeneity of pig IgG 79
Expression of rabbit IgA heavy chain genes in *E. coli* and in murine myeloma cells 279
Perspectives in mucosal immunity: a ruminant model 357
Synergism between antibody and neutrophils in ruminant mammary gland 389
Immune response of cattle to respiratory mycoplasmas 401
Development of nasal, fecal and serum isotype-specific antibodies in calves challenged with bovine coronavirus or rotavirus 425
Establishment of central nervous system infection by canine distemper virus: breach of the blood-brain barrier and facilitation by antiviral antibody 471
Aspects of the immunopathogenesis of flea allergy dermatitis in dogs 483
Interleukin
Bovine interleukin 2: regulatory mechanisms 183
Bovine interleukin 2: cloning, high level expression and purification 193

Intestinal tract
Transfer of serum IgG1 antibody into the gastrointestinal tract in newborn calves 51
Perspectives in mucosal immunity: a ruminant model 357
Intestinal and mammary immune system in pigs 367
Immune response to dietary antigens and its influence on disease susceptibility in farm animals 413
Lymphocytes
Lymphocyte antigens of sheep: identification and characterization using a panel of monoclonal antibodies 91
Phenotypic and functional characteristics of bovine T lymphocytes 113
Phenotypic and functional characterization of pig lymphocyte populations 135
Effector and regulatory T cells involved in the immune response to allografts 255
Transfection of genes encoding lymphocyte differentiation antigens: applications in veterinary immunology 291
Lymphokines
In the regulation of immune responses 173
Macrophages
Synergism between antibody and neutrophils in ruminant mammary gland 389
Immune response of cattle to respiratory mycoplasmas 401
Major histocompatibility complex (MHC)
Structure and expression of class I MHC genes in the miniature swine 211
Human HLA-D region — a summary 223
Biochemical and molecular analysis of sheep MHC class II molecules 231
MHC of the chicken, genomic structure, gene products and resistance to oncogenic DNA and RNA viruses 243
Mammary gland
Intestinal and mammary immune system in pigs 367
Synergism between antibody and neutrophils in ruminant mammary gland 389
Man
Human HLA-D region — a summary 223
Mastitis
Synergism between antibody and neutrophils in ruminant mammary gland 389
Monoclonal antibodies
Lymphocyte antigens of sheep: identification and characterization using a panel of monoclonal antibodies 91
Ontogeny of various cell populations defined by monoclonal antibodies in the primary lymphoid organs of the sheep 103
Phenotypic and functional characteristics of bovine T lymphocytes 113
Bovine mononuclear phagocytic cells: identification by monoclonal antibodies and analysis of functional properties 125
Phenotypic and functional characterization of pig lymphocyte populations 135
Mouse
Transgenic mice in immunological research 267
Expression of rabbit IgA heavy chain genes in *E. coli* and in murine myeloma cells 279
Mucosal immunity
Perspectives in mucosal immunity: a ruminant model 357
Mycoplasma spp.
Immune response of cattle to respiratory mycoplasmas 401
Myeloma
Characterization of a homogeneous paraprotein from a horse with spontaneous multiple myeloma syndrome 69

Expression of rabbit IgA heavy chain genes in *E. coli* and in murine myeloma cells 279
Nematoda
Nematode antigens in protection, diagnosis and pathology 313
Immunochemical studies on the antigens of *Dirofilaria immitis* 345
Nervous system
Establishment of central nervous system infection by canine distemper virus: breach of the blood-brain barrier and facilitation by antiviral antibody 471
Neutrophils
Synergism between antibody and neutrophils in ruminant mammary gland 389
Ontogeny
Of various cell populations defined by monoclonal antibodies in the primary lymphoid organs of the sheep 103
Phagocytosis
Bovine mononuclear phagocytic cells: identification by monoclonal antibodies and analysis of functional properties 125
Pig
Subclass heterogeneity of IgG 79
Phenotypic and functional characterization of lymphocyte populations 135
Structure and expression of class I MHC genes in the miniature swine 211
Progress on gene transfer in farm animals 303
Intestinal and mammary immune system 367
Protozoa
Role of antibody in natural resistance to African trypanosomiasis 325
Immunity to *Eimeria* infections 333
Rabbit
Expression of rabbit IgA heavy chain genes in *E. coli* and in murine myeloma cells 279
Respiratory tract
Immune response of cattle to respiratory mycoplasmas 401
Rotavirus
Development of nasal, fecal and serum isotype-specific antibodies in calves challenged with bovine coronavirus or rotavirus 425
Secretory component
Structure of bovine secretory component 37
Sheep
Lymphocyte antigens: identification and characterization using a panel of monoclonal antibodies 91
Ontogeny of various cell populations defined by monoclonal antibodies in the primary lymphoid organs 103
Biochemical and molecular analysis of MHC class II molecules 231
Progress on gene transfer in farm animals 303
Staphylococcus spp.
Synergism between antibody and neutrophils in ruminant mammary gland 389
Transgenic animals
Transgenic mice in immunological research 267
Trypanosomiasis
Role of antibody in natural resistance to African trypanosomiasis 325
Tumours
Characterization of a homogeneous paraprotein from a horse with spontaneous multiple myeloma syndrome 69
Vaccines
Adjuvants 145

Potentiation of the immune response by immunization with antigens in defined multimeric physical forms 153
Nematode antigens in protection, diagnosis and pathology 313
Viruses
MHC of the chicken, genomic structure, gene products and resistance to oncogenic DNA and RNA viruses 243
Development of nasal, fecal and serum isotype-specific antibodies in calves challenged with bovine coronavirus or rotavirus 425
Rapid detection of viral-specific antibodies by enzyme-linked immunosorbent assay (ELISA) 453
Immune response to viral antigens as a determinant of arthritis in caprine arthritis-encephalitis virus infection 465
Establishment of central nervous system infection by canine distemper virus: breach of the blood-brain barrier and facilitation by antiviral antibody 471
